

TONIGHT'S PROGRAMME 🦋 IN THREE ACTS 🦋 PRESENTING ...

PRAKHAR SHEKHAR

IN THE ROLE OF: *Senior Software Engineer*

A THREE-ACT PLAY · JAVA · AWS · AMAZON TRAVEL

EMAIL | PRAKHAR.MNNIT.2022@GMAIL.COM

GITHUB | [GITHUB.COM/PRASTACK](https://github.com/praxstack)

LINKEDIN | [LINKEDIN.COM/IN/PRAKHARSHEKHAR](https://www.linkedin.com/in/prakharshekhara)

PORTFOLIO | [PRAX-PORTFOLIO-ONE.VERCEL.APP](https://prax-portfolio-one.vercel.app)

STAGE | SHAHJAHANPUR, UP · OPEN TO RELOCATE

[STAGE DIRECTION] (*Lights dim. Curtain up. On a stage of SQS queues and DynamoDB tables, PRAKHAR enters stage left with a fresh Spring Boot pod in hand, Java 17 in the other. Lambdas warm in the wings. Somewhere a Step Function clock ticks down toward opening night...*)

RUNTIME NOTE · ACT I

-47%
p90 latency · 1.10s → 0.59s

RUNTIME NOTE · ACT II

+33%
traveler conversion lift

RUNTIME NOTE · ACT III

-43bps
cost-per-transaction

RUNTIME NOTE · ENCORE

20 → ~5
on-call pages / shift

ACT I

...in which our player takes the stage...

ACT I — THE MAIN FEATURE

SETTING: Amazon Travel, Bengaluru, 2023–25 · hotels, flights & insurance under one proscenium.

SDE II · JUL 2023 – SEP 2025

SHIPPING: PSP — payments, pricing & pipelines **SUPPORTING:** The full booking funnel · 4 microservices · on-call rotation

I | SCENE 1 · THE PRICING FAN-OUT

Enter PRAKHAR, stage left, Java 17 in hand. Re-architected the traveler's pricing call on **CompletableFuture.allOf** with bulkhead **ExecutorService** pools — cut p90 from **1.10s → 0.59s (-47%)**, lifting traveler conversion **+33%** across three sustained quarters.

II | SCENE 2 · THE IDEMPOTENT LEDGER

A Step Function clock chimes; a webhook arrives twice. Designed an idempotent payment webhook on **SQS + Step Functions** with DynamoDB dedupe keys — reclaimed **-43 bps CPT** and silenced the double-capture SEV class for good.

III | SCENE 3 · THE CDK REWRITE

Six legacy pipelines, blocking the wings. Rewrote six deploy pipelines into **Java CDK** with typed constructs and contract tests — **rollbacks halved, MTTR -1 full day**, config drift traced to a single source of truth.

IV | SCENE 4 · THE QUIET ROTATION

ACT II

...wherein prior engagements are recounted...

ACT II — PRIOR ENGAGEMENTS

AS THE TRAVEL SDE

SOFTWARE DEV ENGINEER I

Amazon Travel · Bengaluru

JUL 2022 — JUL 2023 · THE SECOND SEASON

(stage direction: PRAKHAR writes controllers by candlelight, Spring DI glowing softly.)

Authored REST controllers and @Repository DynamoDB DAOs atop Spring DI; steered an auto-insurance renewal flow to **+60% renewal completion**. Held the unit-test line above **80% coverage** with JUnit 5 and JaCoCo gates in CI.

AS THE TRAVEL INTERN

SOFTWARE DEV ENGINEER,
INTERN

Amazon Travel · Bengaluru

MAY 2021 — FEB 2022 · THE OPENING SEASON

(stage direction: GraphQL exits stage right; JAVA enters, bowing.)

Migrated a GraphQL façade to pure **Java**; engineered a **One-Click Renewal** atop Guice DI; kept the test ledger above **90% coverage** throughout. Earned a full-time return offer at the close of the run.

THE COMPANY · ENSEMBLE OF TOOLS

with special appearances by...

AS THE LEAD JVM

Java 17 · Spring Boot · Spring MVC · Spring DI · Guice · Maven · Gradle

AS THE CRITIC QUALITY

JUnit 5 · Mockito · JaCoCo · integration harnesses · contract tests

AS THE CREW OPS

runbooks · alarm hygiene · SEV pages · on-call rotations

AS THE PACE CONCURRENCY

ExecutorService · CompletableFuture · ConcurrentHashMap · ScheduledExecutor · bulkheads

AS THE STAGE FRONT-END

React (SSR & CSR) · Redux · TypeScript · Vitest

AS THE DIRECTOR METHOD

trunk-based · code-review discipline · postmortems · SLO-first

AS THE VENUE AWS

Lambda · DynamoDB · SQS · Step Functions · API Gateway · AppSync · CloudWatch · ECS · CDK (Java)

AS THE LEDGER DATA

DynamoDB single-table · idempotency keys · outbox queues

SOLD OUT
OPENING NIGHT · APR 2026

ENCORES · B-SIDES

works performed after hours...

Redis Server — in Java

[GITHUB.COM/PRAXSTACK/REDIS-SERVER-JAVA](https://github.com/praxstack/redis-server-java)

A from-scratch study of the RESP2 protocol, event-loop I/O, and a hand-rolled hashmap engine — built in the evenings, benchmarked in the small hours.

~78% OF C

Markdown Viewer App

[GITHUB.COM/PRAXSTACK/MARKDOWN-VIEWER-APP](https://github.com/praxstack/markdown-viewer-app)

A zero-config reader with a live plugin architecture and keyboard-first command palette — lean gzipped payload, no runtime baggage.

155+ VITEST TESTS

<100KB GZIPPED

0 RUNTIME DEPS

Open Source — Fabric

[GITHUB.COM/DANIELMIESSLER/FABRIC](https://github.com/danielmiessler/fabric)

Three PRs merged into the 42k-star Go AI-tooling framework — AWS Bedrock bearer-token auth, dynamic region fetching, and a streaming goroutine-deadlock fix.
