

PRAKHAR SHEKHAR P.

JAVA **DISTRIBUTED SYSTEMS** **AWS**

OPEN TO
**SENIOR
SWE!**
(hire our hero)

MEANWHILE, AT AMAZON TRAVEL... Senior SWE with **3+ years** owning Java microservices on AWS — hotels, flights, insurance. Sliced p90 latency from **1.10s → 0.59s** (**-47%!**), lifted traveler conversion **+33%!**, and dragged on-call from **20+ pages/shift** down to **~5**. Comfortable from **SQS & Step Functions** to the **DynamoDB DAO**, and from **CDK** up through **React SSR**.

PANEL №1 • THE MAIN EVENT

Software Development Engineer II @ Amazon • Travel
(Hotels • Flights • Insurance)

'23 → '25
JUL 2023 — SEP 2025 • BENGALURU

Owned **four Java microservices** across the hotel & flight booking funnel — from search APIs down to idempotent webhook processors — and drove the on-call health of the team.

FAN-OUT!

Re-architected the pricing fan-out with **CompletableFuture.allOf** and bulkhead **ExecutorService** pools; cut p90 **1.1s → 0.59s (-47%)** and lifted traveler conversion **+33%**.

SHIP!

Designed an idempotent payment webhook pipeline on **SQS + Step Functions** with DynamoDB dedupe keys; reclaimed **-43 bps** cost-per-transaction and killed the double-capture class of incidents.

DEPLOY!

Rewrote six legacy pipelines into **Java CDK**; halved rollback count and dropped mean-time-to-ship by a working day.

PAGE!

Dragged weekly on-call load from **20+ pages** → **~5**, took config-hygiene violations **5-6** → **0** via automated guardrails and consolidated runbooks.

SAVE!

Resolved **150+ production incidents**; partnered with PM to stop a **~30 bps** funnel-churn drop on insurance attach.

BACK ISSUES · EARLY YEARS!

(two panels, compressed — the montage sequence)

PANEL №2

SDE I @ Amazon · Travel

'22 → '23

JUL 2022 — JUL 2023

First rung. Wrote REST controllers and @Repository-backed DynamoDB DAOs with Spring DI — shipped the auto-insurance renewal flow that lifted renewals +60%.

RENEW!

Built end-to-end auto-insurance renewal flow on a cold-start funnel — +60% renewal completion.

COVER!

Held 80%+ JUnit line coverage via JaCoCo gates in CI; regression escapes ≈ 0 for the year.

PANEL №3

SDE Intern @ Amazon · Travel

'21 → '22

MAY 2021 — FEB 2022

The origin issue. Migrated a GraphQL integration layer onto the Java stack — shipped One-Click Renewal with Guice DI at 90%+ coverage.

SWAP!

Ported GraphQL → Java integration layer end-to-end; zero regressions on cutover weekend.

CLICK!

Built One-Click Renewal with Guice DI; ship-ready with 90%+ line coverage.

THE ARSENAL!

(a nine-panel splash page of tools)

JVM CORE

Java 17 · Spring Boot · Spring MVC · Spring DI · Guice · Maven · Gradle

CONCURRENCY

ExecutorService · CompletableFuture · ConcurrentHashMap · ScheduledExecutor · bulkheads

AWS

Lambda · DynamoDB · SQS · Step Functions · API Gateway · AppSync · CloudWatch · ECS · CDK (Java)

QUALITY

JUnit 5 · Mockito · JaCoCo · integration harnesses · contract tests

ASSEMBLE! THE STACK, IN FULL INK

FRONT-END

React (SSR & CSR) · Redux · TypeScript · Vitest

DATA PATTERNS

DynamoDB single-table · idempotency keys · dedupe queues

OPS & ON-CALL

Runbooks · alarm hygiene · SEV pages · on-call rotations

METHOD

Trunk-based · code-review discipline · postmortems · SLO-first

SIDE QUESTS!
