SUMMARY

Software engineer who joined Amazon as an intern and then became a full-time Software Development Engineer, with **3+ years** across Payments and Travel. Owned **4 microservices** end-to-end — design, build, deploy, and on-call — in **Java 17 / Spring Boot**, and shipped customer-facing **React (SSR & CSR) + Redux**, including an auto-insurance purchase flow with a **60%+** renewal lift. Hotel landing p90 cut **47%** (**1.1s → 0.59s**) and conversion rose **+33%**.

SKILLS

Front-end	React.js (SSR & CSR), Redux, HTML/CSS, JavaScript/TypeScript
Java & JVM	Java 17, Spring Boot, Spring MVC, Guice, JUnit 5, Mockito, SLF4J, Maven, Gradle · <code>ExecutorService</code> , <code>CompletableFuture</code> , <code>ConcurrentHashMap</code> , JVM profiling, GC analysis
AWS	Lambda (Java), DynamoDB, SQS, Step Functions, API Gateway, AppSync, CloudWatch, ECS, CDK (Java)
Distributed Systems	Microservices, REST, GraphQL, event-driven architecture, idempotency & dedup keys, state machines, retry/backoff, DLQ, at-least-once, TDD
Data & Storage	DynamoDB, Redis, NoSQL modelling, SQL, caching strategies
Tooling & Process	Git, GitHub, CI/CD, Gradle JaCoCo coverage gates, Agile/Scrum, on-call, code review, incident response · Python, C++

EXPERIENCE

Software Development Engineer, Jul 2022 — Sep 2025

Amazon · Travel (Hotels & Flights) · Bengaluru

- Service ownership — Spring Boot, Spring MVC. Owned **4 customer-facing microservices** powering the hotel booking platform — search, listing, room selection, order review — across design, code review, deploy, and on-call. REST controllers, service-layer logic, `@Repository` DynamoDB DAOs via Spring DI. Prime-exclusive discount and partner-discount integration — **~30 bps** funnel churn drop.
- JVM concurrency — `CompletableFuture`, bounded executors. Refactored sequential downstream calls into `CompletableFuture.allOf()` on a bounded `ExecutorService`; parallelised 6 partner-API lookups — hotel landing p90 cut **47%** (**1.1s → 0.59s**), conversion up **+33%**. GZIP on 150–200 MB catalog payloads cut wire size 95%.
- Customer delivery — Java + React. Built the auto-insurance purchase flow (Java services + React) with milestone persistence and auto-fill — **60%+** renewal lift, on the four booking services owned through deploy and on-call.
- Testing — JUnit 5, Mockito, Spring Boot. Held **80%+** line coverage; Mockito argument captors for downstream contract verification; `@SpringBootTest` integration tests against in-memory DynamoDB. Introduced Gradle JaCoCo coverage gates in CI.

EXPERIENCE · AMAZON SDE (CONTINUED)

Jul 2022 — Sep 2025 · Travel (Hotels & Flights) · Bengaluru

- **Event-driven — SQS + Step Functions.** Designed idempotent Java webhook for real-time flight schedule changes — SQS ingestion, DynamoDB dedup keys, audit logging, automated offline modifications — 43 bps CPT. Orchestrated booking state machine (confirm/cancel/retry) on Step Functions with Java Lambda handlers.
- **Infrastructure and on-call.** Authored service IaC in Java CDK; migrated 2 services from CloudFormation — rollback incidents halved. On-call from 20+ to ~5 per shift (~2 SDE-weeks/week reclaimed); resolved 150+ incidents; config-hygiene incidents to 0.

Software Development Engineer, Intern, May 2021 – Jul 2021 · Feb 2022 – Jul 2022

Amazon · Bengaluru

- Shipped **One-Click Renewal** for auto-insurance using past-purchase data — async Java pre-fill workflow.
- Migrated legacy GraphQL resolvers to **Java** — DynamoDB via Spring-injected DAOs, API Gateway + Lambda.
- Applied OO design and **Google Guice DI**; 90%+ unit-test coverage (JUnit 5 + Mockito).

PROJECTS

AI Visual Code Review
github.com/praxstack/ai-visual-code-review · npm
Node.js TypeScript Jest VS Code API
Security-hardened visual code-review tool with GitHub-style diff UI, AI markdown exports, command-injection protection, rate limiting. Published npm + VS Code extension.
Published: npm v2.4.1 · MIT.

Coach Atlas
github.com/praxstack/coach-atlas
React TypeScript Mermaid KaTeX
AI technical-interview mentor + tutorial studio; Socratic prep, Mermaid/KaTeX/code rendering, multi-provider BYOK (keys in browser).
React + TypeScript · deployed on Vercel.

Redis Server in Java
github.com/praxstack/redis-server-java
Java 17 ConcurrentHashMap JUnit 5
RESP2-compatible Redis from scratch; bounded ExecutorService, lock-free reads, hybrid TTL eviction, TCP integration tests.
GET 195k rps · SET 154k rps · p50 < 0.3 ms · 42 tests.

Audio Transcription Pipeline
github.com/praxstack/audio-transcription-pipeline
Python Bedrock pyannote pytest
Multi-stage pipeline: raw audio/video → speaker-labelled Markdown. pyannote diarization + AWS Bedrock (Voxtral ASR + Claude repair).
63 tests · 6 stages · MIT.

Open-Source Contributions

Merged into danielmiessler/Fabric (Co, 42k stars):

#2044 — AWS Bedrock bearer-token (ABSK) auth + guided --setup, +882 / -83

#2052 — dynamic Bedrock region fetching (40+ regions), +252 / -15

#2061 — streaming-goroutine deadlock fix in Chatter.Send, +494 / -42

Under review: deer-flow, claude-mem, tolaria.

EDUCATION

Master of Computer Applications (M.C.A.), Computer Science · MNNT, Prayagraj · GPA 9.25 · 2019 — 2022

Bachelor of Science (B.Sc. Hons), Computer Science · Bhaskaracharya College, University of Delhi · 2015 — 2018

AWARDS

Amazon Pay Merchants Categories Champion — 100+ hotel trust-buster bugs; on-call 20+ to ~5 per shift · 2023
