47% P90 LATENCY CUT	+33% CONVERSION LIFT	195k GET RPS · JAVA REDIS	20 → 5 ON-CALL / SHIFT
---	--	---	--

SUMMARY

Full-stack software engineer with **3+ years at Amazon** across Payments and Travel — **owned 4 microservices end-to-end** through design, build, deploy, and on-call. Java-heavy backend (**Java 17 / Spring Boot**, JVM concurrency with `CompletableFuture`, bounded `ExecutorService`, `ConcurrentHashMap`), idempotent event-driven architecture over **SQS + Step Functions**, and typed infrastructure in **AWS CDK (Java)** — paired with **React (SSR & CSR) + Redux** for customer-facing flows. Customer-facing impact: **47% p90** reduction on booking surfaces, **33% conversion lift**, **43 bps CPT** reduction via idempotent schedule-change automation, on-call tickets cut **20+ to ~5** per shift.

CORE TECHNICAL STACK

JAVA & JVM	Java 17, Spring Boot, Spring MVC, Guice, JUnit 5, Mockito, SLF4J, Maven, Gradle · <code>ExecutorService</code> , <code>CompletableFuture</code> , <code>ConcurrentHashMap</code> , JVM profiling, GC analysis
DISTRIBUTED SYSTEMS	Microservices, REST, GraphQL, event-driven architecture, idempotency & dedup keys, state machines, retry/backoff, DLQ, at-least-once, TDD
AWS	Lambda (Java), DynamoDB, SQS, Step Functions, API Gateway, AppSync, CloudWatch, ECS, CDK (Java)
FRONT-END	React.js (SSR & CSR) , Redux, HTML/CSS, JavaScript/TypeScript
DATA & STORAGE	DynamoDB, Redis, NoSQL modelling, SQL, caching strategies
TOOLING & PROCESS	Git, GitHub, CI/CD, Gradle JaCoCo coverage gates, Agile/Scrum, on-call, code review, incident response · Python, C++

EXPERIENCE

Software Development Engineer

Jul 2022 – Sep 2025

Amazon · Travel (Hotels & Flights) · Bengaluru

- Service ownership — **Spring Boot**, **Spring MVC**. Owned **4 customer-facing microservices** powering the hotel booking platform — search, listing, room selection, order review — across design, code review, deploy, and on-call. REST controllers, service-layer logic, `@Repository` DynamoDB DAOs via Spring DI. Prime-exclusive discount and partner-discount integration — **~30 bps** funnel churn drop.
- JVM concurrency — `CompletableFuture`, bounded executors. Refactored sequential downstream calls into `CompletableFuture.allOf()` on a bounded `ExecutorService`; parallelised 6 partner-API lookups — hotel landing p90 cut **47% (1.1s → 0.59s)**, conversion up **+33%**. GZIP on 150–200 MB catalog payloads cut wire size **95%**.
- Event-driven — **SQS + Step Functions**. Designed idempotent Java webhook for real-time flight schedule changes — SQS ingestion, DynamoDB dedup keys, audit logging, automated offline modifications — **43 bps CPT**. Orchestrated booking state machine (confirm/cancel/retry) on Step Functions with Java Lambda handlers.
- Infrastructure as code — **AWS CDK (Java)**. Authored all service IaC in **Java CDK** — Lambdas, DynamoDB, SQS, Step Functions, API Gateway, CloudWatch alarms. Migrated 2 services from hand-rolled CloudFormation — rollback incidents halved.

EXPERIENCE (CONTINUED)

Software Development Engineer

Jul 2022 – Sep 2025

Amazon · Travel · Bengaluru

- Testing — JUnit 5, Mockito, Spring Boot. Held 80%+ line coverage; Mockito argument captors for downstream contract verification; @SpringBootTest integration tests against in-memory DynamoDB. Introduced Gradle JaCoCo coverage gates in CI.
- Operational excellence. On-call tickets cut from 20+ to ~5 per shift (~2 SDE-weeks/week reclaimed). Java email-automation deprecated stale WebLab experiments — config-hygiene incidents from 5–6 to 0. Resolved 150+ production incidents; authored COEs. Built auto-insurance purchase flow (Java + React) — 60%+ renewal lift.

Software Development Engineer, Intern

May 2021 – Jul 2021 · Feb 2022 – Jul 2022

Amazon · Bengaluru

- Migrated legacy GraphQL resolvers to Java — DynamoDB via Spring-injected DAOs, API Gateway + Lambda.
- Shipped One-Click Renewal for auto-insurance using past-purchase data — async Java pre-fill workflow.
- Applied OO design and Google Guice DI; 90%+ unit-test coverage (JUnit 5 + Mockito).

SELECTED PROJECTS

AI Visual Code Review

github.com/praxstack/ai-visual-code-review · npm

Node.js

TypeScript

Jest

VS Code API

Security-hardened visual code-review tool with GitHub-style diff UI, AI markdown exports, command-injection protection, rate limiting. Published npm + VS Code extension.

Published: npm v2.4.1 · MIT.

Redis Server in Java

github.com/praxstack/redis-server-java

Java 17

ConcurrentHashMap

JUnit 5

RESP2-compatible Redis from scratch; bounded ExecutorService, lock-free reads, hybrid TTL eviction, TCP integration tests.

GET 195k rps · SET 154k rps · p50 < 0.3 ms · 42 tests.

Audio Transcription Pipeline

github.com/praxstack/audio-transcription-pipeline

Python

Bedrock

pyannotate

pytest

Multi-stage pipeline: raw audio/video → speaker-labelled Markdown. pyannotate diarization + AWS Bedrock (Voxtral ASR + Claude repair).

63 tests · 6 stages · MIT.

Coach Atlas

github.com/praxstack/coach-atlas

React

TypeScript

Mermaid

KaTeX

AI technical-interview mentor + tutorial studio; Socratic prep, Mermaid/KaTeX/code rendering, multi-provider BYOK (keys in browser).

React + TypeScript · deployed on Vercel.

Open-Source Contributions

Merged into danielmiessler/Fabric (Go, 42k★):

#2044 — AWS Bedrock bearer-token (ABSK) auth + guided --setup. +882 / -83

#2052 — dynamic Bedrock region fetching (40+ regions). +252 / -15

#2061 — streaming-goroutine deadlock fix in Chatter.Send. +494 / -42

Under review: deer-flow, claude-mem, tolaria.

EDUCATION

M.C.A., Computer Science · MNNIT, Prayagraj GPA 9.252019 – 2022

B.Sc. (Hons), Computer Science · Bhaskaracharya College, University of Delhi2015 – 2018

AWARDS & RECOGNITION

Amazon Pay Merchants Categories Champion — 100+ hotel trust-buster bugs; on-call 20+ to ~5 per shift.2023
