ITINERARY

## SUMMARY

Full-stack engineer with **3+ years at Amazon** (Payments & Travel) — **owned 4 microservices end-to-end** through design, build, deploy, and on-call. Java-heavy backend (**Java 17 / Spring Boot**, `CompletableFuture`, bounded `ExecutorService`), idempotent event-driven systems over **SQS + Step Functions**, typed infra in **AWS CDK (Java)**, paired with **React (SSR & CSR) + Redux**. Reliability-first: **47% p90** cut, **+33% conversion**, on-call **20+→~5** per shift.

SEGMENTS

## EXPERIENCE

## Software Development Engineer Amazon · Travel (Hotels &amp; Flights)

JUL 2022 – SEP 2025 · BENGALURU

- **Service ownership.** Owned **4 customer-facing microservices** (search, listing, room selection, order review) on Spring Boot/MVC — REST controllers, service logic, `@Repository` DynamoDB DAOs via Spring DI.
- **JVM concurrency.** Refactored sequential downstream calls into `CompletableFuture.allOf()` on a bounded `ExecutorService`; parallelised 6 partner-API lookups — hotel landing p90 **1.1s→0.59s (-47%)**, conversion **+33%**.
- **Event-driven.** Idempotent Java webhook for real-time flight schedule changes — SQS ingestion, DynamoDB dedup keys, audit logging — highest-impact pain category **-43 bps CPT**. Step Functions booking state machine.
- **IaC — AWS CDK (Java).** Authored all service infra (Lambda, DynamoDB, SQS, Step Functions, API Gateway, CloudWatch). Migrated 2 services off hand-rolled CloudFormation — **halved** rollback incidents.
- **Ops excellence.** Mined multi-year on-call corpus — tickets **20+ → ~5 / shift** (~2 SDE-weeks/week reclaimed); resolved **150+** incidents; **80%+** test coverage (JUnit 5 + Mockito).

## Software Development Engineer, Intern Amazon

MAY 2021 – JUL 2021 · FEB 2022 – JUL 2022 · BENGALURU

- Migrated legacy GraphQL resolvers to **Java** — rebuilt resolver classes wired to DynamoDB via Spring DI, exposed through API Gateway + Lambda.
- Shipped **One-Click Renewal** for auto-insurance (async Java pre-fill); applied OO design + Google Guice DI with **90%+** coverage.

## CABIN

## CORE TECHNICAL STACK

## JAVA &amp; JVM

Java 17, Spring Boot, Spring MVC/DI, Google Guice, JUnit 5, Mockito, Maven, Gradle · [CompletableFuture](#), [ExecutorService](#), GC tuning

## AWS

Lambda (Java), DynamoDB, SQS, Step Functions, API Gateway, AppSync, CloudWatch, ECS, **CDK (Java)**

## DATA &amp; STORAGE

DynamoDB, Redis, NoSQL modelling, SQL, caching strategies

## DISTRIBUTED SYSTEMS

Microservices, REST, GraphQL, event-driven, idempotency & dedup, state machines, exponential-backoff retry, DLQ, at-least-once, TDD

## FRONT-END

React (**SSR & CSR**), Redux (1.5 yrs prod), HTML/CSS, JavaScript/TypeScript

## TOOLING &amp; OTHER

Git, CI/CD, JaCoCo gates, Agile/Scrum, on-call · Python, C++, VTL

## DUTY-FREE

## SELECTED PROJECTS

## Redis Server in Java

[github.com/praxstack/redis-server-java](https://github.com/praxstack/redis-server-java)

RESP2-compatible Redis from scratch. Thread-per-client on a bounded [ExecutorService](#); lock-free reads via [ConcurrentHashMap](#); hybrid TTL eviction; graceful shutdown; TCP integration tests.

**Bench (100 clients):** SET 154k · GET 195k · INCR 128k rps · p50 < 0.3ms · 42 tests, 100%.

## Markdown Viewer App

[github.com/praxstack/markdown-viewer-app](https://github.com/praxstack/markdown-viewer-app)

Production markdown viewer — real-time preview, syntax highlighting, Mermaid diagrams, 10 themes, PDF/HTML export. Modular vanilla JS, sub-100 KB bundle.

**Metrics** 155+ Vitest tests · Mermaid · PDF/HTML export.

## ORIGIN

## EDUCATION

**M.C.A., Computer Science** · MNNIT Prayagraj GPA 9.25  
2019 — 2022

**B.Sc. (Hons), Computer Science** · Bhaskaracharya College, University of Delhi  
2015 — 2018

## MILES

## AWARDS

**Amazon Pay Merchants Categories Champion** (2023) — 100+ hotel trust-buster bugs; on-call 20+~5/shift.
