## NAME
```

PRAKHAR S. PARTHASARTHI

psp(1) — senior software engineer · java · distributed systems · aws

```
## SYNOPSIS ----- psp [--senior] [--java] [--aws] <problem>

usage          $ psp --fix p90 --scale booking-funnel --on-call
email          prakhar.mnnit.2022@gmail.com
github         github.com/praxstack · linkedin.com/in/prakharshekhar
host           Shahjahanpur, UP · open to relocate · [ REDACTED ] (salary)
```

```
## DESCRIPTION ----- elevator(1) — 30 seconds

Backend-leaning full-stack engineer with 3+ years shipping Java microservices on AWS under the Amazon Travel booking funnel — hotels, flights, insurance. I cut p90s with bulkhead executors and CompletableFuture fan-outs, make payment webhooks idempotent with Step Functions + DynamoDB dedupe, and own the on-call dial-tone until it stops ringing. Runbooks, SLOs, postmortems — the boring parts that keep revenue moving.
```

```
## METRICS ----- $ tail -f /var/log/impact
```

P90 LATENCY	CONVERSION	COST / TXN	ON-CALL LOAD
-47%	+33%	-43bps	~5/sh
1.10s → 0.59s	traveler funnel	CPT reduction	pages per shift

```
## CURRENT POSITION ----- $ ps -ef | grep sde2

SDE II@Amazon Travel — Hotels · Flights · Insurance          JUL 2023 → SEP 2025 · BENGALURU
owned 4 Java microservices across the booking funnel · [ REDACTED ] (team-size)

[ OK ] Re-architected pricing fan-out with CompletableFuture.allOf + bulkhead ExecutorService pools — p90 1.10s → 0.59s (-47%), traveler conversion +33%.

[ OK ] Idempotent payment webhook on SQS + Step Functions with DynamoDB dedupe keys — -43 bps CPT, killed double-capture incidents dead.

[ OK ] Rewrote 6 legacy pipelines into Java CDK; halved rollbacks; MTTR -1 day, config drift audited at review-time not 3am.

[ OK ] On-call 20+ → ~5/shift, config-hygiene 5-6 → 0; 150+ incidents resolved; stopped ~30 bps funnel-churn on insurance attach.
```

psp@bengaluru:~\$ man -s 2 psp
PSP(2) System Calls Manual PSP(2)

PREVIOUS POSITIONS ----- \$ history | grep -i sde

SDE I · Amazon Travel
JUL 2022 → JUL 2023 · BENGALURU
Built REST endpoints + @Repository DynamoDB DAOs with Spring DI; shipped auto-insurance renewal driving +60% attach. Held the line at 80%+ JUnit coverage with JaCoCo gates in CI.

SDE Intern · Amazon Travel
MAY 2021 → FEB 2022 · BENGALURU
Led a GraphQL → Java migration on a customer-facing surface; built One-Click Renewal with Guice DI + clean module boundaries. 90%+ coverage before merge.

BUGS ----- report to: prakhar.mnnit.2022@gmail.com

KNOWN-ISSUE: occasionally over-indexes on p90 graphs when p99 is the actual thing on fire. **WONTFIX:** writes runbooks before writing the Slack update. **FEATURE:** bias toward idempotency – will push back on "just retry it." **NOTE:** this résumé compiles on A4 with zero warnings.
