

PRAKHAR SHEKHAR

SENIOR SOFTWARE ENGINEER **JAVA** **DISTRIBUTED SYSTEMS** **AWS**

A zine about **shipping Java**, queues that don't double-pay the customer, and the boring discipline of on-call drops. Three years at Amazon Travel — hotels, flights, insurance — building services that stay quiet at 3 AM.

THE ELEVATOR PITCH, BEFORE THE DOORS OPEN -----

Senior SWE with **3+ years** owning Java microservices on AWS at Amazon. Shipped four services across hotels, flights, and insurance — most visible one **cut p90 latency from 1.1s to 0.59s** and lifted traveler conversion **+33%**. Comfortable from SQS & Step Functions down to the DynamoDB DAO, and from CDK up through React SSR. On-call philosophy: **the shift you don't notice is the best one.**

Software Development Engineer II @ Amazon • Travel (Hotels • Flights • Insurance)

'23 → '25

JUL 2023 — SEP 2025 • BENGALURU

Owned **four Java microservices** across the hotel and flight booking funnel — from frontend-facing search APIs down to idempotent webhook processors — and drove the on-call health of the team.

- ★ **LATENCY** Re-architected the pricing fan-out using **CompletableFuture.allOf** and bulkhead **ExecutorService** pools; cut p90 **1.1s → 0.59s (-47%)** and lifted traveler conversion **+33%**.
- ★ **RELIABILITY** Designed idempotent payment webhook pipeline on **SQS + Step Functions** with dedupe keys on DynamoDB; reclaimed **-43 bps** cost-per-transaction and eliminated double-capture class of incidents.
- ★ **INFRA** Rewrote six legacy pipelines into **Java CDK**; halved rollback count and dropped mean-time-to-ship by a working day.
- ★ **ON-CALL** Dragged weekly shift load from **20+ pages → ~5**, took config-hygiene violations **5-6 → 0** through automated guardrails and runbook consolidation.
- ★ **IMPACT** Resolved **150+ production incidents**; partnered with PM to stop a **~30 bps** funnel-churn drop on insurance attach.

Software Development Engineer I @ Amazon · Travel

'22 → '23

JUL 2022 — JUL 2023

First rung: wrote REST controllers and @Repository-backed DynamoDB DAOs with Spring DI; shipped the auto-insurance renewal flow that lifted renewals +60%.

- ★ **FEATURE** Built the end-to-end auto-insurance renewal flow — +60% renewal completion, on a cold-start funnel.
- ★ **QUALITY** Held 80%+ JUnit line coverage with JaCoCo gates enforced in CI; regression escapes ≈ 0 for the year.
