on-call / shift

Engineered for **scale** and **quiet pagers**.

Full-stack engineer with **3+ years at Amazon** (Payments & Travel) — **owned 4 microservices end-to-end**. Java-heavy backend (**Java 17 / Spring Boot**, `CompletableFuture`, bounded `ExecutorService`), idempotent event-driven systems over **SQS + Step Functions**, typed infrastructure in **AWS CDK (Java)**, paired with **React (SSR & CSR) + Redux**.

Software Development Engineer

Amazon • Travel • Jul 2022 – Sep 2025 • Bengaluru

- **Owned 4 customer-facing microservices** (search, listing, room, review) on Spring Boot/MVC — REST + `@Repository` DynamoDB DAOs via Spring DI.
- **Concurrency**. `CompletableFuture.allOf()` on a bounded pool, 6 partner APIs parallelised — p90 **1.1s → 0.59s (-47%)**, conversion **+33%**.
- **Event-driven**. Idempotent flight-schedule webhook — SQS + DynamoDB dedup, Step Functions state machine — **-43 bps CPT**.
- **Infrastructure**. All service IaC in **AWS CDK (Java)**; migrated 2 services off CloudFormation — **halved** rollbacks; on-call **20+ → ~5/shift, 80%+** coverage.

Software Development Engineer, Intern

Amazon • 2021 • 2022 • Bengaluru

- Migrated legacy **GraphQL resolvers** → **Java** (API Gateway + Lambda); shipped **One-Click Renewal** (async Java); Guice DI, **90%+** coverage.

Location **Shahjahanpur, UP** • open to relocate

Designed by Prakhar in Bengaluru. Built on Java, AWS & a very quiet pager. • [Continued >](#)

Tech Specs

The complete stack.

Every tool, on the record.

Java & JVM	Java 17 , Spring Boot, Spring MVC, Spring DI, Google Guice, JUnit 5, Mockito, SLF4J, Lombok, Maven, Gradle · <code>CompletableFuture</code> , <code>ExecutorService</code> , <code>ConcurrentHashMap</code> , thread-pool tuning, JVM profiling, GC analysis
Distributed Systems	Microservices, REST, GraphQL, event-driven architecture, idempotency & dedup keys, state machines, retry with exponential backoff, DLQ handling, at-least-once semantics, TDD
AWS	Lambda (Java), DynamoDB, SQS, Step Functions, API Gateway, AppSync, CloudWatch, ECS, CDK (Java) — typed IaC for all service infrastructure
Front-End	React.js (SSR & CSR) , Redux (1.5 yrs production), HTML / CSS, JavaScript / TypeScript
Data & Storage	DynamoDB, Redis, NoSQL modelling, SQL, caching strategies
Other Languages	Python, C++, VTL
Tooling & Process	Git, GitHub, CI/CD, Gradle JaCoCo coverage gates, Agile / Scrum, on-call, code review, incident response

Also shipped.

Redis Server in Java

github.com/praxstack/redis-server-java

RESP2-compatible Redis from scratch — thread-per-client on a bounded `ExecutorService` , lock-free reads, hybrid TTL eviction, TCP integration tests.

SET 154k · **GET 195k** · **INCR 128k rps** · p50 < 0.3ms · 42 tests, 100%

Markdown Viewer App

github.com/praxstack/markdown-viewer-app

Real-time markdown viewer — preview, syntax highlighting, Mermaid diagrams, 10 themes, PDF/HTML export. Modular vanilla JS, sub-100KB bundle.

155+ Vitest tests · Mermaid · PDF/HTML export

Education

M.C.A., Computer Science

MNNIT Prayagraj **GPA 9.25** · 2019–2022

B.Sc. (Hons), Computer Science

University of Delhi · 2015–2018

Recognition

Amazon Pay Merchants Categories Champion (2023)

100+ hotel trust-buster bugs; on-call **20+ → ~5** per shift.
